- Develop potential growth/land use concepts

### Public Survey

- ~300 respondents
- Vision
- Principles, goals and objectives

### January 2020

- Refine principles
- Refine goals and objectives
- Identify potential actions

### March 2020

- Review growth scenarios
- Focus Groups: Review and refine actions

### July 2020

- Review and prioritize actions
- Review growth/land use concepts
**Questions for the Leadership Committee**

- Which land use scenario(s) is a good fit for Coeur d’Alene?
- Are there priority areas to focus on?
- What do you think are the highest priority/most critical actions to address in this plan?
Summer 2020: Community Priorities Survey

Survey Summary

- Approximately 1,000 survey responses
- Survey live for approximately one month
- Prioritization of proposed actions
- Identified potential new actions
- Reviewed scenarios and growth assumptions
- Identified where development should occur
Respondents
613 Respondents indicated where they live
Most were inside the city limits

There are two main sections to this survey. Select which topic(s) you would like to provide feedback on. You must check one of the following answers.

- I'd like to see both (knowing that I can...)
- I want to explore and comment on the...
- I want to place pins on the map to...
Check the focus areas you are interested in providing feedback about. Additional information about the goals and actions will be provided for the areas you check.

**Growth/Land Use Concepts**

Which of the following levels of growth do you want to plan for?

- High (97,684 people, 41,000 households, and 94,000 jobs)
- Medium (84,943 people, 35,500 households, and 81,500 jobs)
- Low (72,202 people, 31,000 households, and 69,000 jobs)
Growth Concepts

Combined: Jobs

- A total of 704 Respondents placed pins across the three concepts.
- These respondents placed 1503 pins indicating where job-supporting development should be located.
- The graph below indicates the preferred type of development indicated with each pin (multiple choices were allowed for each response)
Combined: Housing

- A total of 704 Respondents placed pins across the three concepts.
- These respondents placed 1083 pins indicating where housing development should be located.
- The graph below indicates the preferred type of development indicated with each pin (multiple choices were allowed for each response).
CAC and Focus Group Input

• **Focus Groups**: Reviewed public input and revised policy framework
  • Refined actions and objectives, as needed

• **Community Advisory Committee**: Reviewed public input on growth concepts
  • Discussed areas where input was the highest and potential growth/land use concepts

Developing Future Growth Scenarios
Translate Input Into Preliminary Scenarios

- Planning concepts translated to scenarios
- Custom Place Types were applied to all parcels within planning areas for three scenarios
- Existing single-family land uses assumed to stay the same as today

Identify Existing Concentrations of Development

- Heat maps were generated to model current development patterns throughout Coeur d’Alene
- Maps visualize density of existing dwelling units, population, and employment statistics by acre to identify concentrated areas of development.
Apply Place Types/Scenarios to Vacant and Redevelopable Parcels

- Identify parcels for redevelopment
- Vacant/redevelopable parcels were selected from the concept to model potential development capacity
- Most parcels are not assumed to see new development
