What is a Reconnaissance Survey? *It is a survey of the built environment to assess the overall characteristics of the area, identify the age of the structures, architectural styles, building features (size, number of stories, etc.), historic objects, potential historic properties, and could be used to help determine a boundary for a future possible historic district. It does not designate properties as historic or affect property rights.*

The survey is funded by a Certified Local Government (CLG) grant. Field work will be done in April through September 2025. A Historic Context and Survey Report will be produced and a presentation will be made by the consultant to the Historic Preservation Commission in early 2026. Another public meeting to share results will take place during the spring-summer of 2026. The final report will be completed by September 2026. The approximate survey boundaries are shown below.
