If the installation of a private fire service requires an extension of the existing mains of the utility, such extension shall be at the customer's cost.

All private fire services shall be equipped with resilient seated gate valves at the main. State approved backflow prevention must also be installed on each fire service.

Meters may be placed on fire services by the utility at any time; however, metered rates will not apply unless improper use of water is disclosed, and if such be the case, usage will be billed to the consumer based on the Commodity Charge rate schedule.

If the installation of a private fire service requires an extension of the existing mains of the utility, such extension shall be at the customer's cost.

All private fire services shall be equipped with resilient seated gate valves at the main. State approved backflow prevention must also be installed on each fire service.

Meters may be placed on fire services by the utility at any time; however, metered rates will not apply unless improper use of water is disclosed, and if such be the case, usage will be billed to the consumer based on the metered water rate schedule.

If an existing sidewalk panel must be removed, where no additional sidewalk installation will take place, an additional panel replacement fee of \$1,000.00 or actual cost may be charged.

Where a service hookup is other than standard, costs may be calculated by the City to represent actual costs.

The HOOKUP FEE is a separate fee paid in addition to the CAPITALIZATION FEE.

Hookup may be made by a private contractor or licensed plumber to City specifications.
