NOTICE TO NEW OR CONTINUING NON-RESIDENTIAL SERVICE APPLICANTS FOR CONNECTION TO CITY'S SANITARY SEWER

In compliance with the United States Environmental Protection Agency (EPA), the City of Coeur d'Alene has established, by Ordinance #1773, an industrial wastewater pretreatment program. Since the inception of this program in 1983 the City has undertaken a major effort to inspect each of the non-residential users, obtained data, then classified each of the facilities for purposes of issuing permits and for conducting compliance monitoring and inspections. This is done to ensure protection of the City's Wastewater Treatment Plant, allow for the safe disposal of its sludge, and protect water quality.

You are required to notify the City, in person or by phone, 90 days prior to the introduction of new wastewater pollutants, changes in manufacturing operations or any substantial change in the volume or characteristics of the wastewater being introduced into the POTW from the permittee's industrial processes, including the listed or characteristic hazardous wastes for which the permittee has submitted the initial notification under 40 CFR 403.12(p). Formal written notification shall be made at least ten (10) days prior to such introduction and the permittee shall obtain approval from the City to do so.

Whenever the EPA publishes new RCRA rules identifying additional hazardous wastes or new characteristics of hazardous wastes, you must notify the City, EPA RCRA Director and State Hazardous Wastes Director if any of these wastes are discharged to the City's treatment system. The notification must occur within 90 days of the effective date of the published regulation.
